

4-DAY, OCELLATED TURKEY & BROCKET DEER HUNT FOR 2 (CAMPECHE, MEXICO) VALUE: \$18,500

Embark on an exclusive jungle hunting adventure, where your primary pursuit will be Ocellated Turkey and Brocket Deer. Additionally, you'll have the opportunity to upgrade to pursue Brown, Gray, and Red Brocket Deer, Collared Peccary, Great Curassow, Guan, Crested Guan, and more.

Ocellated Turkey is a large, wary bird with excellent eyesight and hearing. Despite its size, it can quickly take to wing to escape predators and can also disappear as quickly on foot. They are omnivores, eating nuts and berries, such as acorns, and juniper berries, insects and occasionally small amphibians or reptiles, such as lizards. Ocellated turkey is only found in a small area of Mexico, Belize, and Guatemala.

Hunting Brocket deer from a hammock is an effective method used in dense jungle environments, particularly in regions like southern Mexico, Belize, and the Amazon Basin, where these elusive deer thrive. Due to their skittish nature and dense jungle habitat, traditional stalking methods can be challenging. A hammock hunting setup provides stealth, comfort, and an elevated vantage point in the thick jungle canopy.
